Are you:

- Interested in a Paid International Research Experience in France?
- Are you a sophomore or junior majoring in Chemistry or Biomolecular Science or Chemical Engineering disciplines?
- Have you considered pursuing doctoral studies or a career in research and/or academia?

**Benefits:** Paid research experience for 8 weeks from May to July 2008

All participants will receive: summer stipend, housing and round-trip travel to the international site, research training and possible academic credit.

**Research Areas:** Bioanalytical chemistry, biochemistry, biosensor development, toxicity monitoring

**Eligibility:** Junior and sophomore students enrolled in School of Arts and Science or School of Engineering with good academic grades and who have a significant interest in chemistry and good aptitude for research.

Applicants with previous research experience will be given priority

---

**Deadline for receipt of applications**

**January 15, 2009**

For application forms and more information please contact:

Dr. Lia Stanciu
