Disable Shutdown Event Tracker for Windows Server 2003

Step 1: Open up the Microsoft Management Console (MMC). (Start > Run > mmc > Click OK)

Step 2: Expand the following tabs: “Local Computer Policy” > “Computer Configuration” > “Administrative Templates”

Click the “System” folder.
Step 3: Double click “Display Shutdown Event Tracker.” (Shown in previous picture)

Choose “Disabled” and click OK.

Step 4: Double check that the “Display Shutdown Event Tracker” state is now “Disabled” and close MMC.
